Experience

Ernst and Young LLP Jan 2023 – Present
Associate Consultant *Gurgaon, Haryana*

- Implemented performance optimization strategies for Angular-based web applications, resulting in a significant reduction in load times by 30 Percent and improved overall user experience.
- Spearheaded the development of responsive, user-friendly web applications using Angular, ensuring seamless user experience.
- Collaborated cross-functionally to gather requirements, design solutions, and implement feature-rich interfaces.
- Utilized a diverse range of technologies including Angular to create robust and scalable frontend solutions.
- Proficient in AWS for application deployment and maintenance, ensuring optimal performance and scalability.
- Employed Agile methodologies, focusing on Jira, to streamline project workflows and facilitate efficient collaboration.
- Actively participated in sprint planning, stand-ups, and retrospectives to ensure timely delivery of high-quality software solutions.

White Force Outsourcing Pvt. Ltd. Mar 2021 – Jan 2023
Front End Developer *Jabalpur, Madhya Pradesh*

- Designed and developed UI layout and front-end programming for web applications, ensuring alignment with wireframes.
- Leveraged HTML5 features such as local storage, Canvas, and SVG to enhance user experience and functionality.
- Enhanced legacy applications by building new components in Angular 8 and TypeScript, improving maintainability and performance.
- Implemented validation controls for form validation, ensuring data integrity and user input validation.

Projects

Blogging CRM | *NextJS, NodeJS, MongoDB, Typescript, OOPS* Mar 2024

- Designed an intuitive and user-friendly CRM interface, simplifying blogging activities management.
- Implemented robust user authentication and authorization mechanisms for secure access control.
- Leveraged MongoDB for efficient data storage and retrieval, ensuring scalability.
- Utilized TypeScript and OOPs principles for modular and maintainable codebase.
- Supported webhook integration for process automation, enhancing productivity.

Central Academy School Management System | *Angular, Ionic, NodeJS* Mar 2023

- Developed a system for efficient student data management, attendance tracking, and result generation.
- Integrated with biometric or RFID-based attendance systems for accurate attendance tracking.
- Provided staff management features including teaching assignments, qualifications, and payroll processing.
- Implemented a secure parent portal for accessing student information and communication with teachers.
